8mm Fisheye Wide Angle Lens

DÖRR

Leave the photographic mainstream for a while! Try new perspectives. The DÖRR 8mm Fisheye Lens provides an extreme wide angle of view with a large focus range. The typical distortion can be used as a creative element. The fisheye lens is ideal for landscape and report photography and you can achieve great effects with many other objects.

Characteristics

- Focal length: 8mm
- Maximum aperture: F/3,5
- Mounts to: Canon EOS, Nikon
- Incorporated lens hood
- Diagonal angle of view: 167°l
- Minimum focus distance: 0,3m
- Manual focusing
- Multi Coating MC
- Optical construction: 10 elements in 7 groups
- Weight app. 430g, length app. 980mm

DANUBIA Telephoto Mirror Lenses
T2 Teleconverter

DÖRR

DANUBIA Telephoto Mirror Lenses

Characteristics

T2 Telephoto Mirror Lenses F8/500mm and F8/900mm
Mirror lenses project the incoming image onto the camera sensor, different from other optical lens constructions. That is why their design is so compact. Light dots out of the focus range if shown as circles – a great tool for create portrait picture composing. The aperture of mirror lenses can not be closed.

- Coating: MC
- Mount: T2, adpaters are available for many cameras

Type	Focal Length	Max.	Filter Size	Length	Ø	Weight	Item No	EAN13	MSRP €
Telephoto 8,5/500 T2	500 mm	1:8,0	72 mm	105 mm	74 mm	350 g	254002	4000461068898	165,00

DANUBIA F8,0/500mm T2 Telephoto Lens with Aperture Setting

Characteristics

This inexpensive telephoto lens comes with classical mechanical lens components, no fancy extras. However, the optical performance is perfect and that is what you need to take good pictures.

- Focal length: 500mm
- Maximum aperture: F/8,0
- Multi Coating MC
- Mount: T2 – adapters available
- Lens system with aperture setting
- Filter mount: 67 mm
- Measurements: 315 mm x Ø 70 mm
- Weight: 710 g

T2 Teleconverter

Characteristics

If the focal length is still not enough, this teleconverter will double it. So you get the maximum even out of far distanct objects.
Aus 500mm lens turns into a 1000mm telephoto lens, a 900mm lens turns into a 1800mm telephoto lens!
The teleconverter is simple mounted between the T2 adapter and the lens. Aperture is reduced by factor 2x.

Ultra 80 LED Ring Light with Flash

DÖRR

Characteristics

80 LEDs ensure permanent and even illumination for all macro and close-up shots.
The additional flash provides even more light and improves the depth of field (1 f-stop).

- Well suited for all DSLRs and digicams with filter mount
- Color temperature: app. 5.500K- 6.500 K (daylight)
- Light intensity: 450 Lux/1m with 80 LEDs
- Power source: 4xAA 1,5V batteries or rechargeable NiCd/NiMH batteries
- Recommended distance to the object: 3 to 100 cm
- Mounts to lens filter thread 52, 55, 58, 62, 67 und 72mm (stepping rings included)
- Measurements: control unit: 93x67x67mm, ring light: 142x119x28mm

Wireless Remote Shutter Release with Timer

Amongst other advantages the wireless remote shutter with timer can be used for time lapse photography, e.g. a flower that starts blooming or for astronomical photography.

Characteristics

- Wireless distance range up to 100m
- 16 Channel selectable (important for use with various camera, e.g. in photo studios)
- 4 Shutter modes: delayed shutter (self-timer), BULB for long exposure time, timer and remote shutter
- Remote shutter function wireless or with cable
- Exposure counter
- Power source: Transmitter 2x AAA Micro batteries, Receiver 1x CR2 battery (both included)
- Measurements: 40 x 20 x 143mm
- Weight: 85g (w/o battery)

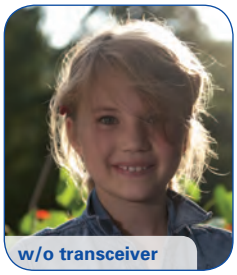
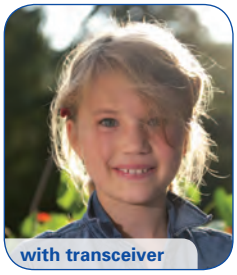
RS Transceiver Kit
TTL Flash Cable, Power Pack HC 2000

RS Transceiver Kit





- Flash trigger or receiver for camera flashes and studio flashes
- Remote camera release as sender of receiver
- Wireless radio transmission covers up to 400 m
- Manual flash release via hot shoe contact
- Number of radio channels: 4 in 3 groups
- Compatible cameras: Canon, Nikon
- Compatible flashes: with Canon or Nikon mount and studio flashes
- X-Flash syncrhonization: 1/320s depending on camera type
- Power source: 2x1,5V AA batteries
- Battery lifetime: app. 400h in standy mode

Filters

Neutral Density Filters & Variable ND Filters

The ND1000 filter extends the exposure time by factor 1000 which corresponds to 10 f-stops.
Example: an exposure time of 1/1000s can be changed to 1s using the ND1000 neutral density filter. As an effect of longer exposure time, you can for example “eliminate“ people moving on squares or landscapes.

Best solution for photographers who wish to react flexibly on light conditions. The ND4-400 increases exposure time variably by the factor 4 up to 400x which corresponds to 1 to 8 f-stops. So you can master any light situation no matter if its landscape, portrait, studio and outdoor photography.

ND 3.0 Neutral Density Filter 1000x

Characteristics

- Optimum contrasts brilliance even with more open aperture
- Reduces the depth of field without overexposure
- Reduces the amount of light by 10 f-stops
- Reduces the available exposure time by a factor of 1000x
- Slim filter frame – avoids vignetting as of a focal length of 18 mm (APS-C) or 28 mm (35mm)
- Black coated metal frame reduces reflections

Graduated Color Filters

DÖRR

Rotating frame allows to use the graduated effect for any situation. Creates harmonic light sceneries with balanced exposure. Ideal for photography and video filming. Front filter mount for additional accessories available.

Characteristics

- Graduated color filter grey — Color neutral, for more balanced exposure when brightness varies
- Graduated color filter blue — Enhances colors for special effects or a deep blue sky
- Graduated color filter orange — Creates impressive sunsets or sets thundery clouds into dramatic scenery
- Graduated color filter tobacco — Enhances warm earth tones or for dramatic sky scenery

Worth to Know

Graduated Color Filter grey: often the sky on pictures is too bright. Exposure time should be shorter for the sky then for the main object. Using grey colored graduated filter you can achieves correct correct exposure all over the image, clouds will be enhanced.

Graduated Color filters: a boring sky can spoil the picture result. A graduated color filter gets more excitement to the picture. The sky scenery can change from romantic to threatening.

TELESCOPE®
Photo & Video Umbrellas

The handsfree umbrella for hikers comes in a compact size. It can easily be mounted at the shoulder straps and hip belt of any backpack. Both hands free! Ideal for nature photographers or hikers who wish their poles also at rain. The silver colored umbrella comes with metallic coating. It can be turned round and use as a sun reflector for filmers and photographers.

The carrying system compares to the belt system or a backpack and is individually adjustable to the body size.
The photo umbrella can be fastened easily at the shoulder strap, using the safety clip supplied with the umbrella and at hip belt using the little support pockets of the system. Once the system is adjusted to the personal body size, it is ready for quick use. Ideal for hikers when walking without backpacks parents with baby carriage, canoeists and everyone who needs free hands in nature at rain or heat.

TELESCOPE® Handsfree Photo Umbrella

- Shaft with 2 extensions, comes with 2 safety clips
- Length closed: 48 cm.
- Lightweight, flexible and extremely rugged fiber glass ribs
- Lightweight and tear resistant Polyester fabric with Teflon® treatment, highly water and dirt repellent
- Comfortable high-density EVA hard foam handle with grooves ensures a dry feeling on the handle when wet
